Education

Chitkara University

Bachelor of Engineering in Computer Science and Engineering

Expected 2028

CGPA: 8.97

Technical Skills

Languages: Java, Python, JavaScript, SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Axios

Backend: Node.js, Express.js, REST APIs, JWT, Bcrypt, Multer, Socket.IO

Databases: MongoDB, MySQL, PostgreSQL

Developer Tools: Git, GitHub, Postman, Docker, Linux, VS Code

Core CS: Data Structures and Algorithms, OOP, DBMS, Computer Networks, Operating Systems

Projects

NeuroFlux – AI Learning Assistant | *React.js, Node.js, Express.js, MongoDB, JWT, Socket.IO*

Live

- Developed and deployed a **full-stack AI-enabled learning platform** that enables students to upload learning resources and access **summaries, flashcards**, and interactive study support.
- Engineered backend services using **Express.js** and **MongoDB** and implemented **secure authentication** using **JWT** and **Bcrypt**-based password hashing.
- Integrated **Multer** for learning-resource upload workflows, **Axios** for client-server communication, and **Socket.IO** for real-time application functionality.
- Built the platform in a **three-member team**, taking ownership of **end-to-end application development**, and tested the product with **approximately 20 college students**.

GrabItGo – Quick-Commerce Web Application | *React.js, Node.js, Express.js, MongoDB, JWT, Mul-Full Stack*
ter

- Developed a **full-stack quick-commerce platform** featuring **user authentication**, product discovery, shopping cart, address management, and order workflows.
- Built an **admin dashboard** for product and category management with functionality to add, update, and delete application data.
- Implemented **JWT-based protected routes**, **email OTP** workflows, **REST APIs**, and **MongoDB**-backed application services.
- Integrated **Multer**-based image upload functionality and resolved file-upload middleware and backend integration issues.

Vishwas – AI-Powered Scam and Fraud Detector | *Backend Development, AI-assisted Fraud Detection Codex 2.0*

- Collaborated in a **five-member hackathon team** to develop an **AI-powered scam detection** solution focused on improving digital safety for rural communities.
- Contributed as a **backend developer** to server-side application workflows and integration requirements.
- Contributed to **risk-based fraud identification** and **voice-accessible workflows** designed to make scam warnings easier to understand.

Leadership & Campus Involvement

Public Relations Coordinator – IEEE

- Supported **sponsor outreach**, public relations, and coordination for a **national-level overnight hackathon** at Chitkara University.
- Contributed to gathering **sponsorship support**, external communication, event promotion, and stakeholder coordination.

Web Coordinator – Institution of Engineers India (IEI)

- Contributed **web-development** knowledge and supported technical and digital initiatives for society activities.

Research & Achievements

- Conducted research in **Artificial Intelligence** and **Smart Cities**, exploring AI-enabled approaches for intelligent urban systems and services.
- Contributed to writing a **research-oriented book chapter**, gaining experience in technical writing and academic documentation.
- Cleared the **first round of the Smart India Hackathon** selection process and participated in college coding and technical events.
- Winner** of a Science Cup competition conducted among multiple schools around Patiala; also participated in debates, public speaking, Mathematics and Science Olympiads.
- Solved **approximately 100 Data Structures and Algorithms problems**, with practice focused on Arrays, Two Pointers, Binary Search, Linked Lists, and Trees.
